

EVA Belle®

pH 4.5

Vaginalni krem

MEDICINSKO SREDSTVO

* Povećava fleksibilnost i potpornu sposobnost tkiva vagine, perinatalne i perinealne oblasti

Od najranijih manifestacija menopauznog sindroma (perimenopauze), proizvodnja estrogena počne postepeno da se smanjuje izazivajući brz gubitak kolagenih vlakana i smanjenje elastičnosti tkiva sa posledicama kao što su vaginalna atrofija, smanjenje senzacije (zadovoljstva) tokom seksualnog odnosa, urinarna i fekalna inkontinencija itd.

EVA Belle® je vaginalni krem koji obnavlja potpornu sposobnost tkiva vagine, perinatalnog i perinealnog područja pomoću kolagena koji sadrži, koji je glavna strukturna komponenta perinealnog vezivnog tkiva. Pored toga, sadrži kombinaciju hijaluronske kiseline sa antioksidantnim vitaminima (vitamin B3, C i E) za negu i zaštitu.

Kombinacija redovne primene **EVA Belle®** zajedno sa programom vežbi karlice (Kegel-ove vežbe) pojačava mišićni tonus i mehaničku snagu u intimnom području u celini.

• **NE SADRŽI PARABEN, VEŠTAČKE AROME I BOJE** •

DOZIRANJE

Inicijalno: 1 aplikacija dnevno 7 dana za redom.

Kasnije: 2-3 aplikacije nedeljno tokom 11 nedelja, 2-3 ciklusa godišnje.

UPUTSTVO

1. Operite ruke pre upotrebe.
2. Držite aplikator sa proširene strane. Usmerite uzak kraj aplikatora ka zemlji i protresite kako bi se sadržaj pokrenuo u pravcu vrata aplikatora.
3. Zadržite aplikator tako da vrat bude usmeren ka zemlji i okrenite plastični poklopac da biste ga otvorili (slika 1).
4. Ubacite vrat aplikatora duboko u vaginu (slika 2), u ležećem položaju i pritisnite drugi kraj aplikatora kako bi se istisnula cela količina **EVA Belle®** u vaginu. Zadržite pritisak na aplikator dok ga vadite iz vagine.
5. Preostalu količinu **EVA Belle®** istisnite na prste i nanesite nežno kružnim pokretima na perinealnu oblast i vulvu.
6. Količinu **EVA Belle®** koja je ostala u tubi treba baciti nakon upotrebe.

EVA Belle®

pH 4.5

Vaginal cream

CE 0653
MEDICAL DEVICE

* Enhancing the flexibility and support of the tissues of the vagina, perigenital and perineal area

From the earliest manifestations of menopausal syndrome (perimenopause), the production of estrogen begins to gradually decrease causing rapid loss of collagen fibers and reduction of the elasticity of the tissues with consequences such as loosening of vagina, reduced sensation (pleasure) during sexual intercourse, urinary and fecal incontinence etc.

EVA Belle® is a vaginal cream that restores the supportive ability of the tissues of the vagina, perigenital and perineal area due the collagen it contains, which is the main structural component of the perineal connective tissue. Additionally, it offers a combination of hyaluronic acid with antioxidant vitamins (Vitamin B3, C & E) for gentle care and protection.

The combination of a regular application of **EVA® Belle** along with a pelvic floor exercises program (Kegel exercises) enhances muscle tone and the mechanical strength of the sensitive area overall.

• **PARABEN-FREE, ARTIFICIAL FRAGRANCES & COLORS-FREE** •

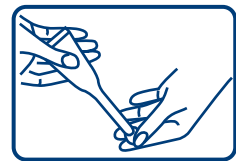

DOSAGE

Initially: 1 application per day for 7 days in a row

Later: 2-3 applications per week for 11 weeks. 2-3 circles per year.

INSTRUCTIONS

1. Wash your hands before use.
2. Hold the tube from the wide end, pointing towards the ground, shake it a few times in order for the content to move towards the nozzle.
3. Keep holding the tube with the nozzle pointed to the ground and rotate the plastic cap to open it (*picture 1*).
4. Insert the nozzle deep into the vagina (*picture 2*), preferably while lying down, press the tube in order to deposit the greatest quantity of **EVA® Belle** into the vagina and remove the tube without stop pressing it.
5. Place the remaining quantity of **EVA® Belle** on your fingertip and apply gently with circular moves at the perineal and vulvar area.
6. Any quantity of **EVA® Belle** that remained into the tube should be discarded after use.
